

Android Supported Bar cord or QR-CodeReaders

Android mobile phones can utilize the following QR-Code reader:

QR Droid

Blackberry Supported Bar cord or QR-CodeReaders

Blackberry mobile phones can utilize the following QR-Code readers:

BeeTagg

i-nigma

Lynkee

Neoreader

QuickMark

Scanlife

UpCode

iPhone Supported Bar Code or QR-CodeReaders

A sampling of iPhone apps for QR-Code readers:

QR Scanner

NeoReader

QR Code
Reader and
Scanner

ScanLife

RedLaser

Bakodo -
Barcode Scanner

Above QR Reader apps are just a sampling of possible applications available for most popular mobile phones. Not all QR Reader applications may adequately display the requested URL or webpage scanned by the QR application. Some phones may have software already installed that allows for bar code scanning with the phone's camera.
